

Industrial SCADA Weather Stations

GeoSUN Africa is a global supplier of industrial grade SCADA weather station equipment and related services for solar power plants. The weather stations are used for plant performance and PR calculations.

Advantages to you as a client:

- Compliant to IEC 61724-1 and related industrial standards.
- Equipment selection and design is based on our vast experience of weather station maintenance.
- High flexibility toward client needs regarding equipment selection – virtually any sensor can be integrated into the weather station.
- Brand neutral although high-end reliable brands are used as a default.

Value added services:

- Installation and/or commissioning of equipment on site.
- On-site training for O&M personnel.
- On-going maintenance and support including on-site annual calibration and related services.
